

## **Medical Director (Senior Director to Vice President Level)**

Neuron23 Inc. is a clinical-stage biotechnology company focused on developing precision medicines for genetically defined neurological and immunological diseases. Neuron23 leverages recent advances in human genetics, combined with knowledge- and artificial intelligence (AI)-enabled drug discovery and biomarker platforms, to advance therapeutics for devastating diseases.

Neuron23 is seeking a talented drug-development physician to join our team. Reporting to the Chief Medical Officer, the Medical Director will design clinical studies and develop protocols for review and discussion, act as a medical monitor and provide clinical support across Neuron23's preclinical and clinical programs. The person will actively collaborate with a variety of external partners to plan and execute early-stage clinical trials. In addition, the individual will work cross-functionally to contribute to innovative trial design.

The successful applicant must be a Medical Doctor experienced in early-stage clinical drug development. The ideal candidate will be a highly ethical patient advocate who thrives in a fast-paced, innovative & dynamic corporate environment that requires adaptability and improvisation and where high performance is expected. Candidates who demonstrate a track record of innovation in trial design and conduct will stand out.

### **Principal Accountabilities**

- Lead medical monitoring of Phase 1 studies that involve significant interaction with clinical sites.
- Create various clinical documents including protocols and Investigator Brochures.
- Collaborate with a variety of internal and external partners and stakeholders, such as clinical investigators, scientists at Neuron23 and external experts and key opinion leaders (KOLs) in order to develop clinical strategy.
- Participate in or present at scientific advisory boards or conferences.
- As appropriate, serve as clinical representative or lead on Neuron23 Project Teams and sub teams, in a matrix organization.
- As needed, participate in Business Development activities including due-diligence exercises and other strategic partnerships.
- Support preparation for regulatory meetings with Healthcare Authorities and, as appropriate, participates in these meetings.
- Represent Neuron23 with KOLs, clinical sites and other important stakeholders with a high degree of integrity and professionalism.
- Ensure clinical activities comply with all governing laws, regulations, Neuron23 Standard Operating Procedures (SOPs) and other guidelines including Good Clinical Practice and other GXP standards.
- Other accountabilities associated with clinical drug development as needed.

## Qualifications

- Board certified (or eligible) Medical Doctor with a preference for certification in Neurology or Immunology; Ph.D. or other additional degrees a plus.
- Strong, relevant therapeutic experience achieved through at least 3 years of direct industry experience (Director-level; 6 years Sr. Director-level) managing clinical trials at a Sponsor or Contract Research Organization.
- Strong background in basic, translational, or clinical research in academia or industry.
- Understanding of clinical drug development (especially phase I and II studies).
- Demonstrable ability to work (with guidance and supervision appropriate to level of experience) in strategizing, designing, implementing, and overseeing clinical development plans, trials and other programs.
- Ability to thrive in a fast-paced, entrepreneurial environment, working collaboratively as well as independently, under broad strategic guidance.
- Well-versed in medical aspects of GCP (Good Clinical Practice), ICH (International Conference on Harmonisation) of Technical Requirements for Registration of Pharmaceuticals for Human Use), FDA, EMEA, NICE and other relevant guidelines and regulations preferred.
- Sound business acumen; has knowledge of the multi-disciplinary functions involved in a company's drug development process, e.g., clinical operations, biostatistics, regulatory, commercial, etc.
- Exceptional interpersonal skills and ability to collaborate with key stakeholders, develop and build strong relationships with partners; established strong relationships with thought leaders, national advocacy and disease organizations, and national standard-setting bodies preferred.

Estimated salary range: \$275,000 - \$350,000. Salary determinations are based on various factors, including but not limited to the level and scope of job responsibilities. Individual pay is further determined by relevant work experience, education, training, skills, certifications, and location. Neuron23 offers a comprehensive and competitive benefits package to help our employees and their family achieve their physical, financial, emotional, and social wellbeing goals.

Neuron23 is proud to be an equal opportunity employer and prohibits unlawful discrimination based on race, color, religion, gender, sexual orientation, gender identity/expression, national origin/ancestry, age, disability, marital and veteran status.

Neuron23 requires employees to be vaccinated against COVID-19. If there is a medical condition or religious belief that prevents an employee from being vaccinated, we will consider whether Neuron23 can make a reasonable accommodation.
